DETAILED ACTION

Specification

The IDS filed on 03/11/2008 is considered.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 22-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Fee US 6,266,170.

Regarding to claims 22 and 24, Fee discloses in Figures 5-7, a chromatic dispersion compensating apparatus, comprising:

a chromatic dispersion compensating module (see Figure 7) having a spectral unit receiving an input light and generating an output light having a predetermined wavelength (col. 5, lines 42-56);

a light return unit (i.e., 254 of Figure 7) designed for the predetermined wavelength to return the output light to the spectral unit, the light return unit and the spectral unit operating together to produce chromatic dispersion (col. 5, lines 9-67); and

a controller changing the relative position between the spectral unit, and the light return unit based on a predetermined position controlling amount and a predetermined

chromatic dispersion value corresponding to the predetermined wavelength (col.5, line 42 to col. 6, line 38).

Regarding to claims 23 and 25, Fee discloses wherein the spectral unit is a virtually imaged phased array (VIPA); see col. 5, lines 33-42).

3. Claims 5, 6 and 20 are allowed.

Response to Arguments

4. Applicant's arguments with respect to claims 22-25 have been considered but are moot in view of the new ground(s) of rejection.
